Hello!

South Nation Conservation (SNC) is requesting your support for a new project titled *Enhancing Operational Flood Modelling, Mapping, and Alerting in the South Nation River Watershed*. SNC will be submitting an application under Natural Resources Canada's Flood Hazard Identification and Mapping Program (FHIMP) Regional Modelling Stream.

This project will advance knowledge and products used in SNC's Flood Forecasting and Warning Program. The project will fill current data gaps and provide timely and accurate information on flood risk, so that everyone has advanced warning of flooding and no one is surprised by a flood.

This is a 3-year project and SNC plans to work with municipal Community Emergency Management Coordinators, to ensure they are receiving the information they need to provide advance warning of flooding hazards. Project products will be shared with municipalities and other watershed residents through information sessions.

We have drafted a Support Letter that you are welcome to use. Please return the signed letter on your letterhead.

Please let us know if you have any questions at all.

Thank you and have a great week!

Kelsey
