

6.0 RE-DISTRIBUTED CONDITIONS (PREFERRED SOLUTIONS)

This section summarises the future forecasted roadway volumes with the preferred solutions implemented on the network as visualised in Figure 27 including:

- Preferred Option: *Option 1* - Convert the existing roadway to a one-way street in the northbound direction with a left-turn restriction at Laurier Street along with traffic calming features to discourage pass-through trips;
- Gareau Street: *Option 1* - Convert the existing roadway to a one-way street in the northbound direction;
- Victoria Street: *Option 1* - Convert the existing roadway to a one-way street in the eastbound direction with traffic calming measures on the wider eastern portion of the roadway to mitigate speeding.

Figure 27: Preferred one-way operating direction for study streets
